Washworld Builds New Corporate Facility

DEPERE, WI - Washworld, Inc., manufacturer of car wash systems, has announced plans to construct a new 50,000 sq. ft. manufacturing and office facility to be located in DePere, Wisconsin.

According to Richard Andreas, Vice President of Sales & Marketing, the new building was necessitated by Washworld's continued expansion of its product line. The company began by manufacturing only one touch free vehicle wash system, the High Velocity, then added two additional touch free machines, the Razor and Revv and a soft cloth system, the Radiantz, as further product offerings. In addition, the Washworld Distributor Network has grown both domestically and internationally. "That's brought more production needs to our facility and we've continued to add on," said Andreas. "We're currently landlocked and can't expand anymore in any direction. The property we're building on will give us room for expansion," he said.

Ground has already been broken for the building which will be located approximately a mile from their current location. The project is expected to be completed in May of 2013. For more information visit Washworld's website at www.washworldinc.com.
