Washworld's New
Foam 'n Flow

Washworld Introduces Foam 'n Flow™

Washworld is excited to introduce our new Foam 'n Flow application system now available on Razor! Fully LED lit, Foam 'n Flow can be used with any Carnuba, hot wax, polish, and conditioning products on the market. Currently an option on the Washworld Razor, Foam 'n Flow will soon be available as a retro-fit for existing equipment.

Foam 'n Flow utilizes the existing pump stand, however has it's own air control mounted on a stainless steel panel. The LED lights are steady on during product application, however can be set to flashing when idle to capture customers' attention.

Washworld, Inc. manufactures the Razor®, Razor Revv™, and High Velocity® touch-free wash systems, and Profile™ and Radiantz® soft cloth wash systems. Systems' features include Washworld's Washview® which allows the operator to access and control the wash from anywhere in the world using a laptop or PC; VS²® Vehicle Sizing System, Washworld's safe, simple and reliable positioning system; and Virtual Attendant—your on-site attendant, 24/7. For more information visit Washworld's website at www.washworldinc.com.
